Product Portfolio

Nueve Solutions offers three core products designed to enhance digital banking operations through automation and self-service capabilities.

1. Automate Banking

Product Description

Automate Banking is an automated user management tool that creates and configures scenarios to automatically manage user group membership and send notifications when users meet specified criteria. The system eliminates manual back-office work by automating the movement of users between different access groups in online banking.

Key Features

New User Management

- Automatically moves new users to less restricted groups after they meet configurable criteria
- Example criteria: account open for 30 days with minimum $500 deposit
- Enables graduated access based on customer behavior and account status

Fraud Prevention

- Automatically moves users to restricted groups when fraud scores exceed defined thresholds
- Triggers restrictions based on suspicious activity detection
- Provides real-time response to security concerns

Inactive User Management

- Reduces security risks by automatically disabling users who haven't logged in for extended periods
- Minimizes unnecessary operational costs associated with dormant accounts
- Configurable inactivity thresholds

Notification System

- Sends automated notifications via email, SMS, and push notifications
- Delivers notifications within 2 minutes of triggering event
- Customizable messaging for different user scenarios

Group-Based Access Control

- Automatically moves users between different permission groups
- Supports criteria-based segmentation (customer status, account type, behavior)
- Enables dynamic access management without manual intervention

Benefits and Performance Metrics

Efficiency Gains

- 99% reduction in manual work hours for user movement operations
- 2-minute notification dispatch time for filtered users
- Eliminates repetitive administrative tasks

Operational Impact

- Automated customer segmentation
- Reduced manual intervention in user management
- Enhanced security through automated response to risk indicators
- Improved customer experience through timely communications

Use Cases

Customer Segmentation: A midwestern regional bank automated their customer segmentation and engagement processes, significantly reducing manual work hours while maintaining precise control over user access levels.

2. Self-Service CDs (Certificates of Deposit)

Product Description

Self-Service CDs empowers customers to independently manage their Certificate of Deposit accounts through online banking, including opening new CDs, renewing existing certificates, and cashing out matured CDs—all without staff intervention.

Key Features

Promotional Capabilities

- Eye-catching banners to advertise attractive CD rates
- Prominent display of best available rates
- Clickable banners that initiate seamless CD opening flow
- Real-time rate and term information

New CD Opening Process
The system enables customers to open new CDs directly from their

online banking portal in a streamlined process:

1. **Term and Rate Selection:** Choose from current terms and available rates
2. **Funding Source:** Select the account to fund the new CD
3. **Amount Specification:** Specify the funding amount
4. **Review and Submit:** Review details and complete the transaction

Key Advantages of Opening Process:

- No SSO (Single Sign-On) to third-party websites required
- No need to re-enter known customer data (address, phone, email)
- Completed entirely within the existing online banking portal
- Real-time processing and confirmation

CD Renewal Management
During the maturity grace period, customers can independently renew their CDs:

- Select new terms from current offerings
- Choose new rates from available options
- Complete renewal with a few clicks
- No phone call or branch visit required

CD Closure/Cash Out
Customers can close matured CDs and manage fund distribution:

- Specify which account receives the CD proceeds
- Optional cashier's check delivery for closed CD funds
- Self-service withdrawal during grace period
- Transparent process with clear confirmation

Benefits and Performance Metrics

Time Savings

- 2 minutes saved per CD renewal compared to phone-based service
- Significantly reduced call center volume for CD transactions
- Faster turnaround on CD renewals and openings

Error Reduction

- 90% reduction in manual errors during CD management by bank staff
- Elimination of data entry mistakes
- Automated validation of transactions

Business Impact

- Increased deposit volumes
- Enhanced customer loyalty through convenient self-service options
- Decreased branch and call center staffing costs
- Improved customer satisfaction with 24/7 availability

Use Cases

Deposit Growth: A Washington, D.C. area bank successfully increased deposits and customer satisfaction by implementing the self-service CD platform, enabling customers to manage their certificates independently while reducing operational overhead.

3. Refer a Friend

Product Description

Refer a Friend is an automated referral solution designed to grow customer base and deposits through peer-to-peer recommendations. The system tracks and automates the entire referral process, from sending invitations to dispensing rewards when qualifying activities are completed.

Key Features

Campaign Types

The platform supports two distinct campaign models:

New Relationship Campaigns

- Goal: Acquire new customers through existing customer referrals

- Reward structure: Both the inviter (existing customer) and acceptor (new customer) receive rewards
- Drives customer acquisition and network growth

New Product Campaigns

- Goal: Open specific account types through financial institution marketing
- Inviter: The financial institution itself
- Reward structure: Only the acceptor (customer) receives reward
- Targets specific product adoption and portfolio expansion

Promotion and Gamification

Visual Promotion

- Eye-popping promotional banners within online banking
- Prominent display of referral program benefits
- Customizable messaging and branding

Gamification Elements

- Dynamically updated counter showing how many friends have joined
- Progress tracking for both inviters and acceptors
- Visual representation of rewards earned
- Social proof through participation metrics

Qualifying Requirements Configuration

Financial institutions can specify detailed qualifying requirements:

- Open specific account types (premier checking, regular checking, money market, etc.)
- Complete minimum number of debit card transactions per month
- Maintain minimum deposit thresholds
- Custom criteria based on institutional priorities

Invitation Methods

Multi-Channel Distribution:

- **Email:** Send personalized referral invitations via email
- **Text/SMS:** Share referral codes through text messaging
- **Social Media:** Post referral links on Facebook, WhatsApp, X (Twitter), and other platforms

Invitation Features:

- Customizable message templates
- Display of program instructions and terms
- Reward details clearly communicated
- Optional terms and conditions acceptance checkbox
- Unique referral codes for tracking

Referral Code Entry and Tracking

New User Experience:

- New users enter referral code when prompted during online banking login
- Simple, intuitive code entry process
- Immediate confirmation of successful referral link

Progress Tracking:

- Qualifying activity status page for acceptors
- Real-time updates on progress toward reward eligibility
- Transparent display of remaining requirements

Automated Reward Dispensation

Configurable Automation:

- Daily job execution to check qualifying activity completion
- Automatic reward disbursement from designated holding account
- Eliminates manual reward processing

Reward Distribution:

- Automatic cash rewards to both inviter and acceptor upon qualification
- Configurable reward amounts and structures
- Audit trail for all reward transactions

Back-Office Management

Q2 Central/Console Integration:

- Comprehensive referral tracking dashboard
- Monitor all referrals and qualifying activity progress
- Manual reward dispensation via "Pay" button option
- Automated dispensation configuration
- Downloadable reports of all accepted invitations
- Status tracking for in-progress referrals

Report Generation:

- Download reports of all accepted invitations
- Current progress status for each referral
- Historical data and completion rates
- Performance analytics

Benefits and Performance Metrics

Cost Efficiency

- 75% lower customer acquisition cost through referrals compared to traditional marketing
- Reduced marketing spend required for customer growth
- Higher conversion rates from warm introductions

Customer Value

- 115% higher lifetime value from referred customers
- Stronger customer loyalty and engagement
- Better retention rates among referred users

Operational Automation

- Complete automation from invitation to reward payment
- Minimal staff intervention required
- Scalable growth without proportional cost increases

Business Impact

- Accelerated deposit growth
- Expanded customer base through trusted networks

- Enhanced customer engagement through participation
- Measurable ROI on referral investments

Use Cases

Deposit and Engagement Growth: A credit union successfully increased deposits, opened new accounts, and boosted overall member engagement by implementing the automated referral platform, leveraging their existing member base to drive sustainable growth.

Technology and Security

Nueve Solutions develops **secure banking applications** with a focus on:

- Data security and regulatory compliance
- Seamless integration with existing banking platforms
- Q2 SDK Partnership and Q2 Certification
- Real-time processing capabilities
- Scalable architecture for institutions of all sizes

Integration Capabilities

All Nueve Solutions products integrate with major digital banking platforms, with particular emphasis on Q2 banking systems. The solutions work within existing online banking environments without requiring customers to navigate to external websites or re-authenticate.

Target Market

Nueve Solutions serves:

- Regional banks
- Community banks
- Credit unions
- Financial institutions seeking to modernize digital banking operations
- Organizations looking to reduce manual processes and improve customer self-service

Competitive Advantages

- Comprehensive automation reducing manual administrative work by up to 99%
- True self-service capabilities keeping customers within familiar online banking portals
- Measurable ROI with documented performance metrics
- Seamless integration with existing banking infrastructure
- Proven results through published case studies
- Q2 Certified Partner status demonstrating platform expertise
- Full-service automation from initiation through completion

Summary

Nueve Solutions provides financial institutions with three powerful automation tools that collectively address user management, deposit growth, and customer acquisition. By eliminating manual processes, enabling self-service capabilities, and automating reward programs, Nueve helps banks and credit unions reduce costs, increase deposits, and improve customer satisfaction while maintaining security and compliance standards.
